TECHNICAL SKILLS

Salesforce Skills:

- Lightning Flows
- Lightning Platform Customization
- Validation Rules
- Data Loader
- Security Configurations
- Lightning Web Runtime
- Reports and Dashboard
- Sales Cloud and Service Cloud

Programming languages:

- Apex Programming
- Lightning Web Components (LWC)
- JavaScript
- HTML
- CSS
- SOQL and SOSL
- Core Java

PROFESSIONAL SUMMARY

- Skilled Salesforce Developer with a strong foundation in **Apex and Lightning Web Components (LWC).**
- Proficient in **Lightning App Builder, Flows**, Process Builder, and Workflow Rules for customizing Salesforce applications.
- Experienced in developing and optimizing **Apex triggers, batch processes, and Asynchronous Apex** for complex business logic.
- Strong capability in building interactive user interfaces using LWC and enhancing user experience.
- Expertise in **Lightning Flow automation** to streamline and optimize business processes.
- Skilled in creating **Custom Objects, Fields, Record Types, Page Layouts, and Validation Rules**.
- Proficient in **SOQL and SOSL** for efficient data querying and retrieval.
- Hands-on experience with **Data Import Wizard, Data Loader**, and Workbench for data migration and integration.
- Strong understanding of **Salesforce security models**, including Profiles, Roles, Sharing Rules, and Field-Level Security.
- Knowledgeable in **REST and SOAP API** integrations for third-party system connectivity.
- Proficient in building unit tests to ensure high code coverage and maintainable solutions.
- Well-versed in **Sales Cloud and Service Cloud** functionalities, including Case Management and Lead Conversion.
- Skilled in creating **Reports, Dashboards, and Reporting Snapshots** for actionable insights.
- Strong problem-solving skills in debugging and troubleshooting Salesforce applications.
- Achieved **Salesforce Certified Platform Developer Certification (PD)**

PROFESSIONAL EXPERIENCE

Salesforce Developer Intern   March 2025 – September 2025
Premium Learning Systems, Pune

- Developed expertise in **Salesforce CRM** through hands-on work with Standard & Custom Objects, Record Types, Page Layouts, and Validation Rules.
- Designed **responsive user interfaces** using HTML, CSS, and JavaScript, integrated seamlessly with Salesforce backend systems.
- Created and deployed **automated Flows** to streamline business processes and improve user experience.
- Formulated **optimized SOQL and SOSL queries** for efficient data extraction and management across Salesforce platforms.
- Delivered **Apex Trigger solutions** implementing best practices, including bulk-operation handling and structured trigger design patterns.
- Built **dynamic LWC components** integrated with Apex controllers and Wire adapters for enhanced interactivity.
- Implemented secure application environments leveraging **Salesforce Security Model** features such as Profiles, Permission Sets, OWDs, Role Hierarchies, and

SOFT SKILLS

- Effective Communication
- Critical Thinking
- Logical Thinking
- Problem Solving Skills

EDUCATION

M.B.A. in Construction Management

NICMAR University, Pune

July 2022 – May 2024

CGPA: 7.88

B.E. in Civil Engineering

Shri Ramdeobaba College of Engineering and Management, Nagpur

July 2017 – May 2021

CGPA: 6.36

CERTIFICATIONS

Salesforce Certified Platform Developer

Salesforce Certified Agentforce Specialist

Lean Six Sigma Green Belt

Trailhead Badges: 100+

Trailhead Rank: Ranger

PERSONAL PROFILE

Languages: English, Marathi, Hindi

Date of Birth: 19 February 1998

Sharing Rules, and executed **REST API integrations** for real-time data synchronization.

- Completed four comprehensive Salesforce-based development projects:
1. **Portfolio Builder**
2. **Body Fat Percentage Calculator**
3. **Recipe Finder**
4. **Hotel Reservation Management Application**

Management Trainee – Contracts   July 2024 – November 2024
AFCONS Infrastructure Ltd., Mumbai

- Reviewed and analysed contract documents for four major construction projects.
- Assisted in drafting, reviewing, and maintaining key contract documentation.
- Monitored contract milestones, deliverables, and payment schedules.
- Supported risk identification and compliance tracking.

Business Analyst Intern   May 2023 – July 2023
Intento Associates, Navi Mumbai

- Researched Global BIM Implementation and its potential growth in India.
- Analysed and investigated the BIM Market in the United Kingdom and Germany.
- Compiled sector-wise data & information about construction companies in UK and Germany working in BIM.
- Advised and consulted about the potential growth in the European market for BIM Consulting.

PROJECTS

Portfolio Builder   *Project Link*

Description: Developed a Portfolio platform that serves as a responsive and interactive online resume, enabling developers to showcase their professional profile, skills, experience, and projects to potential employers and clients. The application provides a complete overview of developer capabilities through dynamic data visualization and responsive design components.

Key Contributions:

- Architected scalable data model using **3 custom objects** (Profile, Education, Work Experience) for comprehensive professional information storage.
- Implemented **Lightning Data Service** integration with **@wire** decorators for real-time profile data fetching and applied Experience Builder target configuration.
- Developed dynamic profile header with integrated social media links using Static Resources and **@api** decorators.
- Applied **Parent-Child communication** to show personal and trailhead information, and **resume download functionality**.
- Created interactive **7-tab interface** for comprehensive professional display.
- Enhanced user experience with rich UI elements such as lightning badges for skills, **Lightning Data-tables** for education, and responsive layouts for all device sizes.
- Designed projects showcase component with external link integration and image previews for live project demonstrations.
- Applied CSS and Global CSS for consistent, responsive UI styling.

Body Fat Percentage Calculator Application   *Project Link*

Description: Developed a Body Fat Percentage Calculator allowing users to calculate and receive their Body Fat Percentage, via a custom-built Salesforce Interface and Website.

Key Contributions:

- Generated and implemented a scalable **data model** for Body Fat Percentage entity.
- Built and deployed a responsive website using **Lightning Web Runtime (LWR)** under Experience Cloud, showcasing interactive **LWC** components and real-time data handling with **Lightning Data Service**.

- Developed a custom Lightning component to calculate and display Body Fat Percentage based on user-provided gender and body measurements.
- Implemented user input functionality to capture name and email for those opting to receive results via email, storing the data in Salesforce using **Lightning Data Service**.
- Designed a **Lightning Flow** to automate the process of sending Body Fat Percentage results to users via email.
- Ensured seamless user experience and functional integrity across the reservation lifecycle.

Recipe Finder Application   *Project Link*

Description: Developed a Recipe Finder Application that seamlessly integrates recipe management and exploration functionalities using LWC. The application leverages Salesforce's integration capabilities with external recipe data sources to provide a robust platform for culinary discovery and enhanced user experience.

Key Contributions:

- Created responsive user interface with **search functionality, and detailed recipe display** featuring images, cooking times, ingredients, and step-by-step instructions.
- Built complete recipe search functionality with **dual search options** - ingredient-based search and random recipe exploration using **external API integration**.
- Developed **modular component architecture** with parent and child components for optimal code reusability and maintainability.
- **Implemented dynamic API integration through Apex controllers** for fetching recipe data from external sources with real-time data processing.
- Designed ingredient-based search component with **comma-separated input parsing** and dynamic recipe filtering capabilities.
- Developed a detailed recipe display component with **conditional rendering**, including full recipe details and seamless **navigation with back functionality** for an enhanced user experience.
- Created **custom CSS styling** with background images and responsive design elements using Static Resources integration.

Hotel Reservation Management Application

Description: Developed a Hotel Reservation Management Application enabling hotel staff to manage room inventory, customer records, and reservations with automated communication workflows. The system features dual user access for managers and customers, automatic customer record creation upon reservation, email notifications for new and extended reservations, manager-only Chatter posts, and scheduled checkout reminder emails on the final day of stay.

Key Contributions:

- Designed data model with 4 custom objects, fields, and relationships to manage hotel reservations.
- Created **Admin Dashboard** for staff to see customer details and reservation details.
- Added a **filter function** for interactive hotel searches with forms, tables, checkboxes and progress indicators using LWC.
- Integrated **Imperative Apex call** on 'Search' button in LWC with reactive data handling using **@wire and @track.**
- Utilised a **Lightning Data Service** functionality to store Customer Reservation Data.
- Applied **NavigationMixin** and **Conditional Rendering** functionalities to browse through the Application.
- Implemented **Toast Notifications** functionality for successful hotel reservation.
- Automated key processes using **Lightning Flows** for approvals, notifications, and reservation updates.
- Built an interactive and responsive UI using CSS and SLDS Library.
